 - National Nature Conservation Designations

Area currently at risk from flooding during the extreme flood event, 0.1% annual probability of occurrence (1 in 1000yr return period).

It is predicted that the probability and extent of flood risk will increase over time as a result of climate change. However, detailed assessments are outside the scope of the SMP.

Job Number: DCSSMP
 Drawn By: JSM

- Shoreline management policies**
- No active intervention
 - Managed realignment
 - Hold the line
 - Advance the line
- Boxes showing cliff erosion estimates represent predicted erosion from the shoreline position in year 0. They are only shown where there is a policy of NAI and cliff erosion is the main risk.
